Sgript

Giving you time to do what matters most

Transform audio, notes and supporting content into secure, completed forms.

Built to fit around your team

Sgript exists to solve these problems:

Heavy Admin Burden

Manual transcription and repetitive data entry create delays and increase administrative burden.

Inconsistent Outputs

Inconsistent document creation leads to errors and makes audit and oversight difficult.

Risky Field Working

Remote and field-based staff struggle to capture and manage information accurately.

Slow Turnaround Times

Turnaround times for reports and assessments are slowed by fragmented processes and duplicated effort.

Teams working in regulated and operationally complex environments spend too much time manually transcribing, re-entering and rewriting information. These fragmented processes slow delivery, increase risk and make consistency and auditability difficult to maintain.

Sgript removes this friction by capturing information once and transforming it into accurate, structured outputs that fit existing processes - securely and with full human oversight.

The Solution

AI-Enabled Document & Form Generation

Transform audio recordings, notes, files and images into accurate, structured documents and web-form ready data.

Template-Driven Consistency & Control

Use organisation-defined templates and workflows to ensure accuracy, compliance and predictable output.

Secure Mobile & Offline Capture

Support audio and note capture in field environments with automatic synchronisation when connectivity returns.

The Output

Sgript produces structured, organisation-aligned reports, assessments, letters, case notes and web-form ready data.
All outputs are generated as drafts, with full human review, approval controls and audit trails to ensure accuracy, accountability and compliance.

The Outcome

Teams reduce administrative effort, eliminate duplicate data entry and improve accuracy. Turnaround times are accelerated, frontline staff are better supported and compliance is strengthened through controlled templates, secure workflows and clear audit trails across all document outputs.

Sgript

Key Features > Simplify the way that you work

Generate Reports Instantly

Transform recordings, notes and files into complete, structured forms. Sgript handles the admin so you can focus on the real work.

Live Documents

Turn transcripts, notes and files into structured Live Documents using reusable templates. Refine content and manage review.

Record or Upload with Ease

Capture meetings and interviews securely in Sgript. Upload existing recordings and let Sgript organise every detail for you.

Secure Offline Recording

Record securely in low-connectivity environments with the Sgript mobile app. Upload automatically when your connection is restored.

Accurate Transcription

Convert recorded or uploaded audio into clear, searchable transcripts. Review and refine content before transforming it into structured reports.

Build & Customise Templates

Create or adapt templates to match your workflows and standards. Keep every document consistent, structured and aligned to your organisation.

Purpose-Built Workspaces

Stay organised with dedicated workspaces for each project or team. Keep content structured, accessible and secure from start to finish.

Multi-Language Support

Record, review and collaborate in up to 40 languages. Improve accessibility and usability across diverse teams and environments.

Microsoft Teams Integration

Access Sgript directly within Microsoft Teams. Capture, review and collaborate without leaving your existing workspace.

Attach Supporting Docs

Add policies and reference materials alongside transcripts. Provide context to support clear review and informed decision-making.

Administrative Centre

Manage user access, licences and retention policies centrally. Maintain oversight and control across your organisation.

Persona Management

Tailor document tone and language for different audiences. Ensure outputs reflect the intended reader and professional voice.

Deployment Options

Flexible deployment to fit your organisation >

1 **Software as a Service (SaaS)**

Use Sgript as a fully hosted, secure cloud service managed by Stable. Simple sign-in, no local infrastructure and rapid onboarding.

2 **Direct Deployment**

Deploy Sgript within your own Microsoft Azure environment, ensuring data and processing remain within your organisational boundary.

How We Embed Sgript > **Designed to fit your team**

We work with teams to ensure Sgript fits naturally into day-to-day work, rather than forcing new ways of operating.

1. **Start with priority workflows**

   We begin by identifying one or two high-impact workflows where Sgript can immediately reduce effort and improve consistency.

2. **Configure templates to match your standards**

   Organisation-approved templates are configured early, ensuring outputs align with existing formats, language and governance requirements.

3. **Pilot with real users**

   Teams use Sgript in live scenarios, generating real outputs while maintaining full review, approval and audit controls.

4. **Scale with confidence**

   Once value is proven, Sgript is rolled out incrementally across additional teams, services or workflows.

Key Benefits

- ✓ **Reduce administrative effort**
- ✓ **Improve accuracy and consistency**
- ✓ **Accelerate turnaround times**
- ✓ **Strengthen governance and compliance**
- ✓ **Support frontline and field-based teams**
- ✓ **Clear audit trails and accountability**
- ✓ **No duplicate data entry across systems**
- ✓ **Seamless, low-risk adoption**

Sgript **Wrap Around Service**

Sgript is supported by a dedicated service model designed to ensure long-term success.

Dedicated Success Support

A named Customer Success Manager supports you from trial through to full organisational adoption.

Ongoing Product Support

Free access to Support Central with direct connection to the product team for guidance, issue resolution and technical support.

Communication Toolkit

A ready-to-use toolkit including branded materials, posts and videos to support adoption and internal communication.

Continuous Updates

Regular security enhancements and feature improvements ensure you always have access to the latest version of Sgript.

Next Steps > **Start with a Discovery Call**

Our delivery starts with a discovery call to understand your organisation, identify priority workflows and define where Sgript will deliver the most immediate value.

From there, we partner with you - starting with a focused pilot and introducing Sgript thoughtfully, so adoption feels considered, supported and confident.
